

## # WHY YOUNG LIVING ESSENTIAL OILS STAND APART

### The Difference That Matters

Ever wondered why Young Living oils are worth choosing over other brands? It's simple: most essential oils on the market are only suitable for cosmetics and perfumes. Young Living oils are designed to **do more** – they're therapeutic powerhouses, not just pleasant scents.

Young Living's unmatched Seed to Seal process ensures purity at every stage. They own their farms, nurture their plants, and control distillation and bottling. No other company owns both farms and distilleries – that's a game-changer for quality.

#### Farm to Bottle Control

Young Living owns and operates farms worldwide, allowing visitors to see their operations firsthand. Their commitment means sometimes oils go out of stock – because they refuse to compromise on quality.

#### Precise Distillation Science

Take Cypress oil with its 280 chemical constituents – most brands distill for just 3.5 hours capturing only a fraction of benefits. Young Living distills for the full 24 hours needed to capture all therapeutic properties.

#### True Value

Yes, Young Living costs more – because you're not getting diluted, synthetic-filled imitations. Their therapeutic-grade oils deliver the full benefits that plants naturally provide, making them worth every penny.
